SUMMARY

I am an Information Technology student at Universitas Brawijaya with a strong interest in web development, software engineering, and problem solving. Throughout my academic journey, I have actively developed my technical skills through various projects, certifications, and organizational experiences. I am accustomed to working in teams, quickly adapting to new technologies, and maintaining a high level of enthusiasm for continuous learning. With a solid educational background and passion for technology, I am committed to growing professionally and contributing effectively in the tech industry.

EXPERIENCE

- ❖ Speaker & Event Coordinator, MMD FILKOM UB 2024 Jul 2024 — Aug 2024
Malang
- Served as a seminar speaker to promote digital literacy within the community.
 - Developed educational materials focused on positive internet use and digital security.
 - Delivered interactive presentations and encouraged active participant engagement.
 - Assisted in the planning, coordination, and execution of the event to ensure its effectiveness and impact.

EDUCATION

- ❖ Universitas Brawijaya 2022 — 2026
Bachelor of Science, Information Technology Kota Malang
- Contributed to research in Artificial Intelligence, developing an anomaly detection system to identify potential fraud on the Airbnb platform using Artificial Neural Networks (ANN).
 - Participated in a project on Analysis, Design, and Information Systems by creating a prototype for software implementation.
